

RC Conversion Kits

Some of our Model Locomotives & Railcars (marked as “**(RCC)**” on our website), can be converted for Radio Control operations by customer’s themselves, using suitable RC gear and battery packs.

Alternatively, [Chuffed 2 Bits Ltd.](#) in the U.K offer RC conversion services for our models. They have in the past successfully installed RC gear into many of our models. Their package includes the following:

Chuffed 2 Bits hand held Transmitter and Receiver X 1 off

Suitable electronic speed controller the C2m/Mtronics “Cruzer” with directional lighting output X 1 off

Electronic dual switch X 1 off

Sound module X 1 off

Instructions set X 1 off

Resonator speaker system X 1 off

772 or suitable Battery pack ([Strikalite](#)) X 1 off

Smart charger X 1 off

Estimated cost for the kit of parts around GBP265

Please note that the model would have to be sent over to [Chuffed 2 Bits](#) works and since the Transmitter & receiver are hand assembled there is a lead time.
